CAREER TIPS

What Is a Startup?

The term startup refers to a company in the first stages of operations. Startups are founded by one or more entrepreneurs who want to develop a product or service for which they believe there is demand. These companies generally start with high costs and limited revenue, which is why they look for capital from a variety of sources such as venture capitalists.

Advantages and Disadvantages of Startups

There are a variety of advantages to working for a startup. More responsibility and opportunities to learn are two. As startups have fewer employees than large,

established companies, employees tend to wear many hats, working in a variety of roles, which leads to more responsibility as well as opportunities to learn.

Startups tend to be more relaxed in nature, making the workplace more of a communal experience, with flexible hours, increased employee interaction, and flexibility. Startups tend to also have better workplace benefits, such as nurseries for children, free food, and shorter workweeks.

The work at startups can also be more rewarding as innovation is welcomed and managers allow talented employees to run with ideas with little supervision.

One of the primary disadvantages of a startup is increased risk. This primarily applies to the success and longevity of a startup. New businesses need to prove themselves and raise capital before they can start turning a profit. Keeping investors happy with the startup's progress is critical. The risk of shutting down or not having enough capital to continue operations before turning a profit is ever-present.

Long hours are characteristic of startups as everyone is working toward the same goal—to see the startup succeed. This can lead to high-stress moments and sometimes compensation that isn't commensurate with the hours worked. Competition is also always high as there tend to be a handful of startups working on the same idea.

Many startups fail within the first few years. That's why this initial period is important. Entrepreneurs need to find money, create a business model and business plan, hire key personnel, work out intricate details such as equity stakes for partners and investors, and plan for the long run. Many of today's most successful companies—Microsoft (MSFT), Apple (AAPL), and Meta (FB), formerly Facebook, to name a few—began as startups and ended up becoming publicly traded companies.

INITIATIVE OF GOVERNMENT OF INDIA TO PROMOTE START-UPS IN INDIA

Startup India is a flagship initiative of the Government of India, intended to catalyse startup culture and build a strong and inclusive ecosystem for innovation and entrepreneurship in India.

Here are the top 10 start-ups in India:

- | | |
|---|----------------------|
| 1. Unacademy. An e-learning start-up, | 5. Razorpay |
| 2. Udaan. Udaan enables B2B trading for small and medium businesses in India. | 6. Meesho |
| 3. CRED | 7. Skyroot Aerospace |
| 4. upGrad | 8. boAt. |
| | 9. Urban Company |
| | 10. AgniKul Cosmos |

Pros	Cons
<ul style="list-style-type: none"> • More opportunities to learn • Increased responsibility • Flexibility • Workplace benefits • Innovation is encouraged • Flexible hours 	<ul style="list-style-type: none"> • Risk of failure • Having to raise capital • High stress • Competitive business environment.

Examples of Startups

Dotcoms were a common startup in the 1990s. Venture capital was extremely easy to obtain during this time due to a frenzy among investors to speculate on the emergence of these new businesses. Unfortunately, most of these internet startups eventually went bust due to major flaws in their business plans, such as lacking a path to sustainable revenue. However, a handful of companies survived when the dotcom bubble burst. Amazon (AMZN) and eBay (EBAY) are just two examples.
