CAREER TIPS

Chartered accountancy is the core of all business, be it big or small. A chartered accountant's work involves auditing, taxation, accounting and financial planning. It can be a very challenging and rewarding job.

The Chartered Accountancy course is conducted by the Institute of Chartered Accountants of India, which has its headquarters in New Delhi, 5 regional offices (Calcutta, Kanpur, Chennai, Mumbai and New Delhi) and 81 branches under these regional centres.

Step-by-Step

➤ Common Proficiency Test (CPT)

CPT is an entry level test of four subjects i.e. Accounting, Mercantile Laws, General Economics and Quantitative Aptitude.

➤ Integrated Professional Competence Course (IPCC)

This is first stage of CA curriculum wherein only working knowledge of core and allied subjects to accountancy profession is covered. The subjects of IPCC are classified into two groups which a student can study and appear in the examination group-wise or both the groups together. IPCC is designed to improve knowledge of accountancy linked to accounting standards to build strong foundation for developing knowledge of financial reporting at the final stage. The students update their knowledge of business communication, business strategies, taxes, information technology and audit.

➤ CA Final

CA Final covers advanced application knowledge of core subjects like financial reporting, strategic financial management, advanced management accounting, advanced auditing and professional ethics and information systems control and audit. In addition, principles of e-governance, corporate and allied laws, international taxation and VAT are important features of the updated subject contents.

➤ Articleship

The students after passing Group I of IPCC will register for Articleship for a period of three years with experienced CAs. Certain rules do apply - CAs with 16 years of experience and above can take on about 8 articles, those with less experience can train fewer articles and these teachers or 'Principals' as they are called, can be changed during the course of training. An agreement of training needs to be executed before it begins. During the training time, articles learn the technical details of the work and as time passes, they are given larger assignments with less supervision. All articulated clerks are paid a stipend depending on their city's population.

Start Early

In today's cut throat competitive world, it is advisable that a student starts planning right after class 10. For chartered accountancy, a student can register with the Board of Studies and prepare for entry level test while pursuing 10+2. It is better to take mathematics at this level. Students of commerce stream definitely have an advantage while pursuing this career. The latest scheme of CA is designed to encourage young talented students having aptitude for accounting education to make an early entry into the profession.

Different Roles, Different Names

A Chartered Accountant's work area has become so wide and involves so many activities that sometimes a CA is perceived as almost an enigma. A CA can start career with auditing activities, which is the basic work area of a CA. From here a more fulfilling career in finance can be pursued after getting enough exposure of intricacies of finance. As an investment consultant and as a fund manager a CA can play the role of a top decision maker. CAs also work in project management and consultancy services.

Top Companies/Verticals

- Banks (Both private and public)
- Public Limited Companies (mandatory for the purpose of law)
- Auditing Firms (such as KPMG, Price Waterhouse, etc.)
- Finance Companies, Mutual Funds, Portfolio Management Companies, Investment Houses, Stock Broking Firms
- Legal firms, Legal houses, Patent Firms, attorneys, Trade Mark and Copyright Registers.

Tips for Getting Hired

Accounting is a precision oriented job. Pay attention to how you dress, speak and conduct yourself in company. These also add a personal charisma which helps in maintaining good relations with peers and clients.

You need to understand the business world. It is also important that you show this understanding. Start looking at the bigger picture in terms of company

numbers. This business acumen is a prerequisite for a CA.

- Leadership and analytical skills are vital to a chartered accountant. Besides these, work on your communication skills both oral and written.
- Be prepared to work long and hard when needed especially in the taxation months.
- Maintain high ethical standards.

Pay Package

- **For CA Inter:** Generally candidates holding CA inter-qualification are paid somewhere between Rs 7,500 and 15,000 depending on the type of firm. Payments can be higher for candidates possessing other qualifications such as MCom or an MBA. On the other hand starting salaries can be as little as Rs 4,500 to 5,000 in some small towns of the country.
- **For CA Final (FCA):** Starting salaries range between Rs 12,000 to 30,000 depending on the type of firm and nature of the economy. A full fledged CA can expect a salary between Rs 30,000 to 75,000 after serving a stint of more than 5 years at a top firm.

Market Watch

Chartered Accountants have been one of the most sought after professionals in India. Much of the reputation of CAs is due to the fact that their rigorous training (both theoretical and practical) makes them practically jack of all trades as far as the domain of finance is concerned. In spite of the sea change in global trade systems and practices, the requirement of CAs has remained steady.

The demand for CAs has been growing between 10% to 15% over the past 3 – 4 years. The demand however depends on the state of the economy and there is direct bearing on the demand of CAs when the economy is in downtrend. But the statutory clause for mandatory appointment of CAs provides substantial cushion support to the CA fraternity as compared to other comparable peers.

Is it the Right Career for Me?

It is generally believed that only students of commerce should pursue CA course. However, CA being a very practical course, the students from science and arts streams can equally benefit and make a successful career. Students of science and arts stream have to make extra efforts in order to understand some complex accounting nuances and have to get basic knowledge of various management topics. But it can be easily concluded that students of science and arts streams can be successful CAs, if they are ready to toil.

International Focus

The qualification of CA is globally recognized hence industry outlook for CAs is bright indeed. Much recognition for CA degree is due to the fact that the CA course has been able to keep pace with changes in industry scenario. Several new modules and topics have not only been incorporated into the CA course but have been very effectively implemented to give increasing more power to the CA degree. In spite of the fact that several top-notch B-schools (including IIMs) have produced some of the most brilliant B-school grads, it is noteworthy that CAs has been able to retain their prominence in present world order.

Positives/Negatives

+ves

- The job is highly paying.
- CAs command tremendous respect in the organisations and society.

-ves

- It can be a stressful job as the responsibilities are enormous and there is no scope for any errors.
- Regular update of knowledge is a must otherwise it may lead to stagnation in career.
